I'm not as familiar with the Tedd account so I don't know if Len did anything special to it but usually username = email address.

On the odata screen cap it just said Tedd.

Not Tedd@weston.

Maybe trying using the Tedd Weston email credentials with odata?

Yes I believe Tedd has default view private rights.

Check the view exclusive box on the Epaosc site for the Tedd contact and you should be good

Negative, I get access denied. I took a closer look and the R6 site is marked as "Exclusive", could that be the issue?

Can you login into the Epaosc site directly with the Tedd credentials and see the site?

Hey friendly ERT team, we are trying to use the TEDD account to pull photos through the Odata feed from the R6 Gold King site, but it seems to not have access. I've also tried adding TEDD as a contact, but still no luck.

Any ideas?
